

Fake Candle

FAKE CANDLE

Le candele FAKE a prima vista sembrano degli eleganti moccoli in cera bianca, in realtà sono dei contenitori in PVC a forma di candela. Cavi all'estremità superiore della misura adatta ad inserire un lumino. Questa idea intelligente riduce al minimo i tempi di manutenzione e gli sprechi poiché non colano, sono facili da pulire e rimangono inalterate sia ad alte che a basse temperature, sono adatte quindi a tutte le stagioni.

Si usano con un normale t-light e una volta finito basta sostituirlo. La caratteristica traslucenza del PVC permette una diffusione maggiore della luce creando atmosfere ancora più suggestive.

At first sight, the FAKE candles seem to be just some stylish white wax candles.

Actually, they are PVC candle-shaped containers with a hollow on the top, suitable to hold a t-light. Once the t-light is used up, you just need to replace it with a new one.

Thanks to this smart idea, maintenance and wastes are reduced to a minimum because they don't gutter and, moreover, they are very easy to clean.

The FAKE candles are perfect for all seasons, because they keep unaltered in high and low temperatures. The characteristic translucency of PVC enables a bigger light diffusion, creating more suggestive atmospheres.

A première vue, cela ressemble à d'élégantes bougies en cire, mais en réalité la gamme FAKE est en PVC.

Au dessus de chaque chandelle, une cavité est préformée pour recevoir un t-light.

Une fois le t-light consommé, il faudra juste le remplacer.

La gamme FAKE vous apportera tous les avantages d'une vraie bougie sans ses inconvénients:

- ne coule pas
- résiste au temps, aucune altération de couleur
- nettoyage facile

La transparence du PVC permet une plus grande diffusion de la lumière et de ce fait vous permettra de retrouver des ambiances chaudes comme une bougie classique.
